THE DUTCH GOVERNMENT SUPPORTS IMPROVEMENT ON STATIA

St. Eustatius - The Dutch government has provided funds to St. Eustatius through projects and programs in 2018 to help create a stronger community. The list outlines the large scale investments in various areas. The projects cover physical as well as administrative and economic improving areas. Through proper tender requirements, primarily local contractors have been selected, which had and has a positive effect on employment and has an impact on self-reliance of the entire community. It is vital that these projects are properly managed, because they require significant commitment of the resources of the Public Entity, therefore a project manager was identified to guide and process several of these projects. Many members of the local community were able to participate through employment in projects and programs which contributed to a vibrant Statian community.
